

 **WARNING:**
POWER WINDOWS CAN KILL CHILDREN!

Hundreds of children have been injured or have died because of dangerous power windows in vehicles. The average power window has the power to cut a cucumber or a carrot or a grapefruit in two. And, today, too many cars on the road have "rocker" or "toggle" switches that are too easy to push and windows that do not automatically reverse when encountering resistance. A child in a car, with their head out of the window, a knee inadvertently pushing the switch, is a disaster in the making.

The message to parents is clear: Never, ever leave a child alone in a car. Not for one minute. The message to auto manufacturers is also clear: Every single car should have the safer switches that must be pulled up to raise the car window. And, just as garage doors, every car should come with "auto-reverse" mechanisms on all power windows. Power windows have the power to kill.
